

Select a cell which
equilateral triangle shapes
(filled, must be completed by
4 turns)

Select a cell which is on any
position below the last
player's cell (not on the
same horizontal line)

Select a cell which squares
shapes (filled, must be
completed by 4 turns)

Select a cell which is next to
an odd number (vertical or
horizontal)

Select a cell which has at
least 2 numbers as
neighbours (vertical or
horizontal)

Select a cell which
equilateral triangles shapes
(Cells are edges)

Select a cell which has at
least 2 letters as neighbours
(vertical or horizontal)

Select a cell which is on the
same horizontal line from the
last player's cell

Select a cell which is a
number of sequence $2n+1$ (n
integer)

Select a cell which has a
letter without curves (eg V, T,
Y etc)

Select a cell which has at
least 2 numbers as
neighbours (vertical or
horizontal)

Select a cell which is on any
position above the last
player's cell (not on the
same horizontal line)

Select a cell which has a letter which comes after the last player cell or a number greater than the last player cell

Select a cell which has background blue, purple or brown

Select a cell which has a number between 20 and 80

Select a cell which is between the last player's cell and your last cell

Select a cell which equilateral triangle shapes (filled, must be completed by 4 turns)

Select a cell which is on any position below the last player's cell (not on the same horizontal line)

Select a cell which is a number of sequence $2n+1$ (n integer)

Select a cell which is a number of sequence $n+3$ (n integer)

Select a cell which has background blue, purple or brown

Select a cell which has a number that contains a digit which was also found on your last number cell (eg 13, 36, 65, 51 etc)

Select a cell which equilateral triangles shapes (Cells are edges)

Select a cell which is an even number

Select a cell which has a letter or number you have never played before

Select a cell which is between the last player's cell and your last cell

Select a cell which has a letter which can be found on your last or first name

Select a cell which is an odd number

Select a cell which has a number or a letter but with a sequence (number, letter, number etc)

Select a cell which has at least 2 numbers as neighbours (vertical or horizontal)

Select a cell which has a number or a letter but with a sequence (number, letter, number etc)

Select a cell which is next to an even number (vertical or horizontal)

Select a cell which has a number between 20 and 80

Select a cell which is on any position above the last player's cell (not on the same horizontal line)

Select a cell which is on the same horizontal line from the last player's cell

Select a cell which has at least 2 letters as neighbours (vertical or horizontal)

Select a cell which is on the same horizontal line from the last player's cell

Select a cell which equilateral triangles shapes (Cells are edges)

Select a cell which has at least 2 numbers as neighbours (vertical or horizontal)

Select a cell which has a letter which comes before the last player cell or a number less than the last player cell

Select a cell which is next to an even number (vertical or horizontal)

Select a cell which a horizontal line every 3 turns

Select a cell which has a number that contains a digit which was also found on your last number cell (eg 13, 36, 65, 51 etc)

Select a cell which is on the same vertical line from the last player's cell

Select a cell which is an even number

Select a cell which is between the last player's cell and your last cell

Select a cell which equilateral triangles shapes (Cells are edges)

Select a cell which is on any position above the last player's cell (not on the same horizontal line)

Select a cell which has a number greater than 40

Select a cell which has background blue, purple or brown

Select a cell which squares shapes (Cells are edges)

Select a cell which a diagonal line every 3 turns

Select a cell which equilateral triangle shapes (filled, must be completed by 4 turns)

Select a cell which has a letter which comes after the last player cell or a number greater than the last player cell

Select a cell which has at least 2 letters as neighbours (vertical or horizontal)

Select a cell which has a letter which comes after the last player cell or a number greater than the last player cell

Select a cell which is on the same diagonal line from the last player's cell

Select a cell which has a number which contains digit 3 (eg 35, 13 etc)

Select a cell which a horizontal line every 3 turns

Select a cell which has a letter without curves (eg V, T, Y etc)

Select a cell which has a letter which can be found on your last or first name

Select a cell which equilateral triangle shapes (filled, must be completed by 4 turns)

Select a cell which has background color yellow, orange or red

Select a cell which has a number between 20 and 80

Select a cell which is on the same vertical line from the last player's cell

Select a cell which is an even number

Select a cell which has a number between 20 and 80

Select a cell which has a number that contains a digit which was also found on your last number cell (eg 13, 36, 65, 51 etc)

Select a cell which has a number or a letter but with a sequence (number, letter, number etc)

Select a cell which has background blue, purple or brown

Select a cell which is a number of sequence $n+3$ (n integer)

Select a cell which has a letter without curves (eg V, T, Y etc)

Select a cell which has a number less than 40

Select a cell which has at least 2 numbers as neighbours (vertical or horizontal)

Select a cell which rhombus shapes with equal sides (Cells are edges)

Select a cell which has a number between 20 and 80

Select a cell which is an odd number

Select a cell which has a letter which comes before the last player cell or a number less than the last player cell

Select a cell which has at least 2 letters as neighbours (vertical or horizontal)

Select a cell which is a number of sequence $n+3$ (n integer)

Select a cell which is a number of sequence $2n+1$ (n integer)

Select a cell which has a number that contains a digit which was also found on your last number cell (eg 13, 36, 65, 51 etc)

Select a cell which has a letter which comes after the last player cell or a number greater than the last player cell

Select a cell which has a letter which can be found on your last or first name
